## RUSSIA KEYNOTE TO WORLD PEACE

Churchill Says Entire Change  
in Situation is Coming  
Shortly.

LONDON, July 18.—"Russia at the present moment is the keynote of the future peace of the world," said the first duke of the league of nations, said Col. Winston Churchill, secretary of state for war, in an address at the British-Russian club dinner last night.

"If the whole of Russia and its resources fall into the hands of Lenin and Trotsky, the whole power of the Bolshevik forces will be thrown against those little states which have been promised the protection of the league of nations. If the Bolshevik forces prevail in Russia these little states, say, Russia itself, will fall into the hands of Germany," he continued.

Mr. Churchill defended the action of the allies in sending troops to Russia and said if the five great powers had been able to act in concert "things would not be the same there." He declared that more than 200,000 Bolsheviks were being held in check by the allies and "if the British government contributed in any way toward that result, I for one rejoice."

Mr. Churchill predicted an entire change in the situation within a fortnight, but did not explain what it might be.

## FRENCH HAVE GUN TO SHOOT HUNDRED MILES

PARIS, July 18.—While giving evidence before a committee of the chamber of deputies investigating the Breky question, M. L. Bourgeois, chief engineer of the navy department, said that at the time Paris was being bombarded by German long range guns, he had designed a cannon with a range of 100 miles which could be put in position in an hour.

Mr. Bourgeois stated that previous to that time he had urged upon Albert Thomas, under-secretary of state for war and munitions, the importance of bombarding the enemy works and had been asked to design a long range cannon. His plans, however, were sent from one committee to another, and the order to manufacture it was not given until February, 1918. The gun was ready for action at the time the armistice was signed, he said.
